APPLICATION METHOD

POLY-CRETE MD SL is applied to a properly prepared area at the required thickness using a "V" notched squeegee. The freshly placed material is then loop rolled into which the proper size quartz aggregate is broadcast to excess to achieve the desired profile. Allow a minimum of 6 hours for the Base Coat to cure before sweeping, sanding or vacuuming. A second quartz broadcast is delivered into DUR-A-GLAZE #4. Apply two ACCELERERA top coats to achieve the required finish. See Application Instructions on our website for a detailed installation procedure.
