High-Performance
at Every Level.**

Seamless Suite[®]

FLOOR + WALL SURFACES
Designed for Healthcare

In the rapidly changing healthcare industry, certain requirements remain constant: facilities need to be cost effective, sterile yet simple to maintain, attractive to the eye and provide years of worry-free service.

While this is a tall order, Dur-A-Flex has created a product that achieves all of these requirements by engineering together our performance floor system with our innovative wall system to create - Seamless Suite.

Remediating failing floor surfaces or repainting walls can impact patient care and your organization's bottom line. Seamless Suite floor and wall system provides durable, seamless surfaces that are impenetrable by water, germs or other potentially harmful microbes. Its outstanding durability will provide peace of mind knowing your floor and wall coatings will:

- ✓ Protect patients
- ✓ Save money in life-cycle costs
- ✓ Deliver the desired aesthetics

Sanitary

Floor and wall systems that integrate seamlessly - no joints and seams mean no space to harbor bacteria, reducing risk of HAI's. A continuous, easy-to-clean surface is especially beneficial in areas with intensive cleaning requirements for disease-spread and cross-contamination prevention.

Durable

Seamless Suite walls are engineered to stand up to the harshest chemicals and up to 10x the scrubbing versus traditional paint and epoxy coatings. Our floor systems offer extreme durability, able to withstand constant foot traffic, rolling beds and heavy equipment.

Fast Installation

Fast-installing systems means quick turnaround and minimal interruption to patient care.

Attractive

With Seamless Suite there is no need to sacrifice aesthetics for durability as it comes in a multitude of colors, blends and finishes. Custom color matching is also an option to match any décor.

Occupant Friendly

Our floor and wall systems are environmentally friendly VOC compliant (low emitting) and will earn your facility LEED® credits. Zero VOC means zero offensive odors thus maintaining a high-level of air quality during the installation process, allowing for renovations without any disruption to patients.

Reduce Annual Maintenance Costs*

With Seamless Suite, there are no re-occurring costs for stripping and waxing floors nor the costs associated with frequent wall repainting due to constant cleaning and disinfection - especially in facilities following CDC protocols. What's more, with systems that can be installed in as quick as a day, your downtime and interruption to your revenue stream is minimal.

*Based on typical installation and life expectation using correct maintenance techniques.

Seamless Suite is perfect for:

- ✓ Operating Rooms
- ✓ Emergency Rooms
- ✓ Post Anesthesia Care Units
- ✓ Bio-containment Units
- ✓ Patient Rooms
- ✓ Corridors
- ✓ Laboratories
- ✓ Cleanrooms
- ✓ Any area that needs constant cleaning

SeamlessSuite Pairings

Seamless Suite offers unlimited decorative color options and combinations. The pairings below are only a few popular suggestions. Match your decor or design your unique Seamless Suite. Refer to our complete color selection at dur-a-flex.com, where you can also request physical samples from our Design Center.
