

SEAMLESS FLOORING SYSTEMS FOR DATA CENTERS

Ensuring the safety of your data and equipment are paramount to you and your business. You need flooring that is watertight, durable, and provides an easy to clean surface for your data center. Dur-A-Flex's seamless flooring systems offer minimal downtime for installation as well as various properties such as dust proof, UV stable, smooth, and Electro-Static Dissipative whether it's a Tier I or a Tier IV facility.

Dur-A-Flex provides a variety of seamless resinous flooring options, a network of trained professional installers, and on-going support so you get a product that stands up to the toughest environments in your data centers.

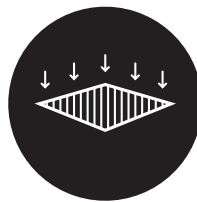

DOWN TIME

Quick cure options offer minimal downtime for faster return to service

LOW MAINTENANCE

Flooring solutions with a minimal maintenance regimen last longer and perform better over time than alternative sheet style or synthetic tile options

WATERTIGHT

Offers a watertight barrier to corrosive elements that would harm the concrete

MOISTURE MITIGATING

Installs in more environments, including those with high moisture levels up to 99% RH
